C. W. ROSSELL'S.

On the Side.

It is to be noted that grain raisers in the district are wearing a slightly more cheerful look, and talking in a rather less pessimistic tone, all because of the good omen on Wednesday of last week, when a dust-laying shower fell over the district. This was followed later by a squall of rain, and a squall of thunder, storm and electric display. One of the oldest meteorologists says we are in for a good grain growing season, unless all signs fail. Well, here's hoping!

Another freak bet has just been recorded, this time at Lethbridge. Two chaps of that town aiming to get into the spotlight, have made a wager to walk in their pajamas from a restaurant to the Post office a distance of a quarter mile, the deciding factor being whether oil is struck in a certain well, within 30 days. The name of one chap is Bill, but it's hardly likely to be the same Bill who shocked local Society a year ago by appearing at a public event in his P.J.s.

Strange as it may seem this oil news item synchronizes with the opening of the sucker season.

Just as everything is quieting down a bit, some one starts agitating for the Cons. S. D. to be changed to a Town District.

Those interested in summer drinks have noted we're to have 3 per cent—but, it will be a 3 per cent tax on the gross revenue of sales of soft drinks.

Stony Plain and District.

Mr Hardwick made a business trip to the City yesterday.

Mr Denis Maisenko arrived in from Prince Albert on Sunday.

Sunday morning's train to Vancouver came thru over the road.

Mr P. H. Miller Jr. is under the doctor's care this week.

The Football Club meets this evening at 8.30, in the Royal Parlor.

Percy Gilbert left on Saturday with a bunch of work horses for the new farm at Namayn.

Mr Ph. Trapp opened his new bake-shop on Saturday last, with a good assortment of white and rye bread, cakes and buns. Patronise home industry.

Rev E. Bishop of Edmonton preached the sermon at the evening service in the Methodist Church on Sunday last.

Mr Shuster, of the Swift Co., Edmonton, spent the week end with friends at Comet.

Mr Jas Warner has moved down with his outfit to the new farm South of Holborn.

Mr Joe Whitelock, the drainage engineer at Golden Spike has planned a very extensive program of work for the summer.

After a visit with friends at Mundare, Mrs. Wasyl Paulow has returned to her home at Carvel.

Fishing in Johnny Creek is pretty good at present—the Savard Brothers of Carvel, returning on Saturday with a carload.

LOCAL NEWS.

Mr. R. Blom was last week taken to the Miercoridia Hospital to undergo an operation.

Mr. Mason Leeder has moved in to the Ross Newell house on Fifth Street.

Mr. George Broadbent is visiting friends at Bon Accord.

Mr. Ph. Trapp has rented the Peter Baron house.

Hewlett's Edmonton Orchestra has been engaged for the dance at Mission's Barn, May 25th.

The welcome news arrives that Red Barney has secured a job in the Mountains for the summer, counting the grizzly bears.

Mr and Mrs Thies are leaving this week for Washington.

Mr Ryley has retired from the passenger transport service to Stony.

Mr J. Straussburger loaded and shipped a car of wheat this week.

The rock slides in the Mountains are again interfering with the railway traffic.

The local tennis courts are being made ready for the use of the racquet ball players.

The Breckford Junior last week, reports a fairly good patronage on the opening days.

Another popular young couple of the district are billed to be "spliced" on Sunday next.

Mr K. A. Ulmer is said to have purchased the Schwartz 2 acres and house on 3d St, and will shortly move to town, to reside.

The road to the city has undergone a very decided improvement during the past week.

Local Fire Guardians have received instructions to keep a watchful eye on all spring fires.

Mr. Alcorn, who has been night operator at the station for a few weeks, leaves this week for his home in Melville.

His place here is being taken by Mr. Carpenter, of Stareo, Alta.

Meridian Lodge held another degree meeting Tuesday night, at which several members were advanced.

Tuesday evening next is the regular monthly convocation. This lodge is now in a prosperous condition, and the officers expect they will shortly be awarded a charter for the lodge.

And now for a few sporting events!

Excelled In Bravery

Yet Nature Lover Was Startled at Ordinary Noise

In Detroit I had breakfast with James Oliver Curwood, the novelist. Curwood is perhaps the greatest lover and student of nature in America. He has made the northwest a magic land of romance and real adventure. The cry of the wolf-pack is more thrilling in his ears than a high note at the Metropolitan. He has slept with a young grizzly and been in many tight places while hunting dangerous wild animals. Still we of the city have our moments of bravery. I noticed Curwood was startled as a waiter laid a dish clutter to the floor, while I did not even so much as bat an eyelash. —New York Correspondent.

Poor Service

She was in a telephone booth and had just put in a toll call. "She went bitterly as she pulled down on the hook to attract Central's attention. "Hello?" came Central's clear voice. "Hi—hello," she sobbed. "I want my money back, Harold w—wouldn't speak to me." —New York Sun.

Reduces swelling of bruises and strains

It may be a sprained wrist or elbow—a bruised muscle—a strained tendon—

Exports of Butter

In the last fiscal year Canada exported a little over 2,000,000 pounds of butter more than she imported, according to information tabulated in the House of Commons recently. The United Kingdom received 3,713,709 pounds; United States, 3,022,939; Belgium, 110,262; Bermuda, 232,060; British Guiana, 32,533; Barbados, 29,735; Jamaica, 215,224; Trinidad and Tobago, 109,640; other British West Indies, 67,943; China, 61,555; Cuba, 25,464; France, 112,009; Newfoundland, 632,246; St. Pierre and Miquelon, 81,102; other countries, 73,986.

Sentenced to Death,

The death warrant is "passed out every time a corn is treated with Putnam's Corn Extractor. It means the end of the corn. Putnam's lifts out corn, root and branch, and never fails. Refuse a substitute for Putnam's. 25c everywhere.

High Grade Wheat

Ninety-Eight Per Cent. of 1922 Crop Was Marketable

Returns from elevators, flour mills, railway companies and crop correspondents to the Bureau of Statistics show that on March 31, 1922, the quantity of wheat in Canada was 129,738,000 bushels, as compared with 114,986 bushels in 1922. Of oats, the total in Canada on March 31, 1922, is estimated at 191,718,000, as compared with 175,616 bushels in 1922. At the end of March, according to the reports of crop correspondents, 14 per cent. of the total wheat crop of 1922 remained in farmers' hands.

Of the total estimated wheat crop of 1922, viz., 209,736,000 bushels, 98 per cent. is reported by crop correspondents "as having proved of merchantable quality, the proportion representing 209,987,000 bushels, last year's corresponding figures, were 96 per cent., or 208,316,000 bushels out of 209,858,100 bushels. The proportion of 8 per cent. for 1922 is higher than in any previous year since these reports were instituted in 1899. In Saskatchewan the proportion is even higher than the percentage for all Canada, being 99 per cent.

More than a million children between ten and sixteen years of age are working in the United States, according to the 1920 census. No count was made of those at work under ten.

Household Hints

Valuable Recipes For The Busy Housewife

Cinnamon Buns

$\frac{1}{2}$ cake yeast, $\frac{1}{4}$ teaspoon salt.
 $\frac{1}{2}$ cup lukewarm water, $\frac{1}{2}$ cup melted butter.
 $\frac{1}{4}$ tablespoon cinnamon, 4 cups flour.

2 cups hot milk, $\frac{1}{2}$ cup sugar.
 $\frac{1}{2}$ cup softened butter, 2 eggs.
Additional flour for kneading.
1 cup Sun-Maid seedless raisins.

Soften yeast in lukewarm water. Pour milk into mixing bowl and when lukewarm add yeast and mix thoroughly. Stir in flour and beat until smooth. Cover, set in a warm place and allow to rise over night. In the morning add beaten eggs, sugar, salt and melted butter. Turn out on well floured board and knead until smooth and elastic, using as little flour as possible. Moisten top with milk. Cover and allow to stand in a warm place until double in bulk. Turn out on floured board and roll to $\frac{1}{4}$ inch thickness. Cream $\frac{1}{2}$ cup of softened butter with cinnamon and $\frac{1}{2}$ cup of brown sugar. Spread dough with this mixture and sprinkle with raisins. Roll like jelly roll. Cut off in pieces $\frac{1}{4}$ inches long. Cream remainder of softened butter with rest of brown sugar and spread in deep pan. Stand rolls on end in pan and allow to rise again until double in bulk. Bake in moderate oven 20 to 40 minutes. Turn out of pan immediately, before sugar hardens. This makes 15 buns.

Caramel Raisin Apples

$\frac{1}{2}$ cup Sun-Maid seedless raisins, 6 tart apples.

1 cup light brown sugar.
2 tablespoons butter.
Pare, core and halve the apples, and arrange in a broad saucpan or aluminum frying pan. Cover with the raisins, then sugar; add the butter, cut into bits, add water and stew gently until apples are tender and the butter and sugar have formed a rich caramel. May be served hot or cold, with or without cream, or as an accompaniment to plain boiled rice.

BABY'S OWN TABLETS

ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first convulsions her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Salsbury, Feltier, St. Dumais, Que., writes: "I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Not Fair Play

"There's a church near," said the country farmer to his paying guest, "that I ever put my nose in it." "Anything wrong with the vicar?" "Well, it's this way. I sold the old vicar milk and eggs and butter and cheese, and seeing as he patronized me, patronized him. But this new chap keeps 'is own cows and hens. If that's your game, I thought 'well 'ave 'ome-grown religion too."

Minard's Liniment for Neuralgia

Good Counsel for Hog Breeders

Finished Bacon Hogs Should Weigh Around 200 lbs. at Six Months Of Age

A. A. MacMillan, Chief of the Sheep and Swine Division at Ottawa, gives excellent advice to swine breeders when he says: The profitable hog is the one that keeps growing from birth to finished market weight. Grow the pig out by feeding skim-milk, shorts, alfalfa and roots, or blood or fish meal. Finish the pig when grown on barley, oats and corn. Mature bacon hogs are finished weighing 200 to 210 pounds at six to seven months of age. A few extra dollars invested in the hog will often save a good many bushels of grain when finishing your hogs for market, and will get the farmer better prices.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

THE CENTAUR COMPANY, NEW YORK CITY

Safety First For Ole

Ole Olson had been working as an engine wiper, and his boss, a thrifty man, had been coaching him for promotion to fireman with such advice as: "Now, Ole, don't waste a drop of oil—it costs money. And don't waste the waste, either—that's getting expensive, too."

With these facts of economy pondered thoroughly into his head, Ole went up to be questioned on his eligibility as fireman. The last question was: "Suppose you are on your engine on a single track. You go around a curve and see rushing toward you an express. What would you do?"

Said Ole: "I grab de dam' oil can. I grab de dam' waste—an' I yump, by jinyiny!"

As a vernacular an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Czechoslovakia possesses a deposit of silica mineral of volcanic origin which can be used directly in the manufacture of glass without adding any of the common ingredients used in making up the glass batch. This mineral resembles lava and the deposits are very large.

Finds Savage Race

A race of aboriginal savages with no alphabet and a language of only five hundred words has been discovered by Warren C. Van Slyke in the interior of French Indo-China, according to an announcement made by him on his arrival at Washington from Liverpool.

Asthma Cannot Last when The greatest of all asthma specifics is used. Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has to his credit thousands of cases which other preparations had failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

The banana produces more food to the acre than any other plant. Its yield is about fifty times more than the potato, and about one hundred and fifty times more than wheat.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark registered in the U.S. Patent Office. Manufacture of Monoclonal Aspirin by Bayer. While it is well known that Aspirin means Bayer, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Exploration Work In Great Northern Areas Reveals Our Little Known Resources

Every extension of lines of survey and communication into the unknown or little known areas of Canada brings to light resources, the existence of which had previously only been conjectured. This was the case in the course of the work done in 1921-22 in determining and marking the Manitoba-Ontario boundary northward from the Winnipeg River.

By Act of Parliament in 1912, the provinces of Ontario and Manitoba were increased in size, the former to include the district of Patricia, lying north of the old boundary along the English and Albany Rivers, and the latter to embrace a vast area to the north and west of this district. Both provinces were thus provided with frontage on the tidal waters of Hudson Bay. The new inter-provincial boundary may briefly be defined as a due north line from the end of the previous boundary at the Winnipeg River to the twelfth base line of the Dominion Lands system of survey, from which point it turns northeasterly to the most eastern point of Island Lake, and thence to Hudson Bay about 360 miles distant. There was at that time nothing on the ground to mark this new boundary; it was purely an imaginary line, existing on paper only.

While the primary object of the survey was to mark the boundary, the importance of collecting topographical and other information, which could very conveniently be done at the time, was not lost sight of and special divisions of levelers, geologists and topographers were attached to the survey party. The length of line surveyed is about 180 miles. Through this district, also, over 1,100 miles of shore line of lakes and rivers have been mapped, the location and character of all timber along the line has been noted, the adjacent country has been examined geologically, and the elevation above sea level of all points along it has been determined.

In view of the present lack of information in regard to these areas, it is too much to suppose when full information is obtained, that their resources will occupy a place in keeping with those of the older part of Northern Ontario? A reference to these latter resources reveals their extent and range.

The per capita export of wood products in Canada, including pulp and paper, is among the greatest in the world and ranks next in our Dominion to the export of grain. The pulp and paper industry is now carried on through nearly all that part of Northern Ontario served by the three transcontinental railway lines that link the grain-producing prairies of the west to Eastern Canada, and at the present time is reaching out into what are now the more inaccessible parts of this area. Two of the pulp mills in operation are amongst the largest in America.

Another resource—the mineral—has recently come into prominence and has become an integral factor in the development that has already taken place in parts of Northern Ontario. The annual silver production and gold production at Cobalt, Porcupine and surrounding districts is in each case roughly about seven per cent. of the world's output. The greatest nickel deposits known are in Northern Ontario. In addition there are important copper and iron deposits.

This area possesses, as well, a fertile extent of agricultural land, estimated at 16,000,000 acres. On the Winnipeg River, near the boundary between the provinces of Ontario and Manitoba, two immense water-power developments are now in operation and a third is under construction. The fur trade in the vicinity of the Ontario-Manitoba boundary is one of the most important of any of our fur-producing districts.

Thus considering the resources already known and those foreseen, it is seen what a heritage Canadians have in this unexploited and practically unexplored hinterland.

Mississippi is the only state in the Union which, by constitutional provision, prohibits the bequeathing of property to charitable objects. An amendment to remove this restriction is to be submitted to the voters.

A Worthy Plan

A Dollar Reserve In Canada Towards Payments of England's Debt to the United States

At the annual meeting of Bovril Limited, held in London last month, Sir George Lawson Johnston, who presided, in presenting a very satisfactory report to the shareholders, took occasion to suggest a means which might tend to prevent the turning of exchange against the Mother Country, which these heavy remittances would provoke.

We quote his words: "It was that we should build up in Canada a reserve towards the payment of the American debt. The Canadian and United States dollars were not likely to vary seriously in value, therefore any fund we could build up in the Dominion would be comparatively free from exchange fluctuations. Canada was capable of being developed at a much more rapid pace than the present capital and man power at its disposal could develop it. Our Government could now borrow at a lower rate than it had been able to do for a good many years. It is it could obtain grants of land from Canada it could utilize, say, one hundred million pounds in developing wheat areas, and probably certain industries in that Dominion; and this work in conjunction with some considerable emigration scheme of selected unemployed, should develop in Canada a reproductive asset that would, after a while, annually supply dollars towards the payment to the States. Furthermore, every bushel of wheat bought from Canada instead of from the States would help to keep our exchange better with the latter."

"We might thus accelerate the pace at which Canada was growing strong, and at the same time, build up an asset that would much reduce the burden of the American debt, and probably, in the process, some of the money we provided would purchase from our manufacturers agricultural implements and other machinery, etc. "Any such scheme to be successful

The Important Place That Corn Has Come To Occupy In Canadian Agriculture

would have to be planned and brought forward by Canadians to meet their own views as regards the directions in which development should take place. It was put forward at present they could feel, at any rate, the Canadian conditions would be understood by a British Premier, who was born in Canada, and a Colonial Secretary who had recently served as Governor-General."

This suggestion has been re-echoed lately elsewhere and seems well worth the serious consideration of the Powers that be. Sir George Lawson Johnston is well known in Canada, and not only those who know him, but all who study general trade conditions, will be interested in the fact that the export business of Bovril in 1922, was over 20 per cent. greater than that of its previous record—and the company's net earnings also showed very satisfactory results.

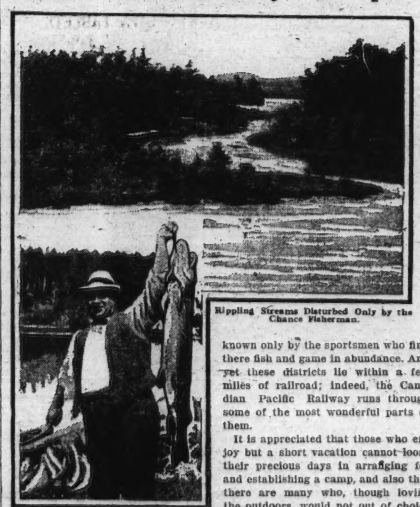

Praise For Insulin Cure
Says: Banting Will Rank With Pasteur and Jenner.

Declaring that the name of Dr. P. B. Banting, of Toronto, will be associated with the names of Pasteur and Jenner in the future, Dr. Simon Flexner, of the Rockefeller Institute of Medical Research, paid high tribute to the Canadian doctor and his discovery of insulin.

Dr. Flexner said the insulin treatment discovered by Dr. Banting had cured many patients who had been given up as hopeless. The serum, he said, though in its experimental stage, already had provided of the greatest value in treatment of diabetes.

Tokio is the sixth largest city in the world.

New Tourist Country will Open

A Nipigon "Lodge"

Rippling Streams Disturbed Only by the Chance Fisherman

known only by the sportsmen who find there fish and game in abundance. And yet these districts lie within a few miles of railroad; indeed, the Canadian Pacific Railway runs through some of the most wonderful parts of them.

It is appreciated that those who enjoy but a short vacation cannot lose their precious days in arranging for and establishing a camp, and also that there are many who, though loving the outdoors, would not out of choice spend their holidays under canvas with the attendant discomforts and inconveniences; so with the object of developing tourist resorts along the line in the Nipigon and other districts, and helping to open up the country, the Canadian Pacific Railway is building three Bungalow Camps after the style of those which have found favor with visitors to the Canadian Pacific Rockies. These camps, which will be completed and ready for occupation by July 1st, will consist of a central community house, where meals will be served in a large room, which will also serve as a recreation room, surrounded by small rustic bungalows suitable for two or four persons. The privacy, simplicity and rusticity of these bungalows appeals particularly to those who like outdoor life, and the moderate cost of construction will make it possible to charge much lower rates than elaborate hotels where overhead costs of construction and operation are necessarily high.

Sweet Clover For Silage

The Greatest Crop Find of the Present Generation

(By J. G. Haney, Agr. Extn. Dept., International Harvester Co.)

A pasture, hay, silage and fertilizer crop that will produce with greater certainty than the crops being commonly grown, would be of greater benefit to the Great Plains Region than any one thing that should be named. A great effort has been made to find such a crop, and we believe that it has been found in the biennial yellow and white blossom sweet clover.

Greatly increasing the acreage and use of this crop, and the building of silage either kinds of silage to store feed for livestock, will do more to put the Great Plains on a stable agricultural basis than any other two things that can be named. This will make possible a more diversified and safe farming system, the keeping of livestock, growing a living on the farm, instead of buying it from the stores, keeping up the fertility of the soil, preventing blowing of soils, and increasing the farm profits.

A pasture, hay, and soil building crop is needed on every farm. Your excuse for not growing sweet clover for these purposes doubtless is that you have not heard about it, and did not know that it is the greatest crop that can be grown for such purposes. Sweet clover is just what you have been, or should be looking for, for your farm. Sow it for pasture, hay and feed, and plow it under for enriching the soil.

Sweet clover is a biennial legume, a deep-rooted, vigorous growing crop that will build up or renew soils. It will grow and produce more hay, pasture or seed, under more adverse conditions, than any similar crop. It is adapted to a wider range of soil, from the best to dry, wet, sandy, stony or alkaline, than its nearest competitor, alfalfa. Sweet clover is without any doubt the surest seedling (and the seed is as easily sown) of any of the forage crops grown. Hundreds of thousands of acres are being sown for pasture, hay and fertilizer from Florida to the Canadian Northwest. It makes good on all lime or alkaline soils. Like other legumes, it does little harm on acid soils, which are the opposite of alkaline soils. Ten years ago this crop was a despised weed. Today farmers who are growing it, and scientists who have investigated its feeding value, soil-building properties and adaptability to a wide and varied soil and climatic condition, acclaim it the greatest crop find of the present generation.

Earth Has Luminous Tail

May Be Gases Or Tiny 'Moons, Say Astronomers

If we could get a view of the planet on which we live as we can other planets through the telescope, certain observers tell us we would see that our earthly ball draws after it a luminous tail. Other planets have likewise their special distinctions. Saturn has its rings, or belts, of light. Jupiter is covered with wonderful circles of color. Mars is interested with strange lines supposed by some to be canals. The Earth's great tail, stretches far away behind her into space like that of a comet. Sometimes on clear evenings just at sunset one may catch a glimpse of it, appearing as a faint glow in the east exactly opposite the setting sun.

What constitutes this tail is not actually known. Astronomers think it may be a huge cloud of gases, trailing away for hundreds of thousands of miles, or it may be formed of countless tiny moons, ranging in size from a cricket ball to a house, but all of them too small to be seen individually.

The fruit of the uumangu tree of South Africa yields a strong intoxicating drink. Elephants are said to be very fond of it, becoming quite tipsy, staggering about, playing antics, screaming so as to be heard for a mile and sometimes having tremendous fights.

The true road to happiness is to exact much of oneself and little of others.—Thomas Cappon.

Not such a very long time has elapsed since it was generally pronounced that Canada would never become a successful wheat producer, and the Dominion responded by growing a variety which crops are outdistanced any other produced elsewhere and, on account of its peculiar desirability, came into universal demand for milling purposes. She has grown this in ever-increasing volume until in 1922 a zenith was reached, with a production of 295,600,000 bushels. The same was said, and generally accepted, in respect to corn, and the corn belt was generally conceded to terminate long before the international boundary was reached. Yet corn is grown in Canada every year now in great quantities, 12,788,000 bushels for husking being produced in 1922, 14,904,000 bushels in 1921, the average for the past five years being 12,629,410 bushels per annum.

Whilst corn has been raised in the Eastern Canadian provinces for years it is only recently that this has come to be an important crop to the western farmer, and each year the corn acreage of the prairie provinces shows a substantial increase. The high quality of the product of the western provinces was attested when a grower from Kelowna, Manitoba, exhibited at the Texas State Fair and carried off the championship trophy, winning out against the premier exhibits of the first corn-growing states of the Union.

The important place corn has come to occupy in Canadian agriculture was evidenced at the beginning of the present year when a corn show held in Essex County, Ontario, turned out to be what is believed to be the biggest event of its kind on the American continent in point of attendance and exhibits. The attendance for the four days the exhibition was open was twelve thousand and there were more than three hundred exhibitors and more than fifteen hundred exhibits. There were more than six hundred prizes, amounting to nearly \$2,000. The quality of the corn exhibited was excellent and the more than one thousand bushels displayed exceeded in quantity the International Show at Chicago.

The honor of staging the continent's biggest corn show is a novel distinction for Canada and a noteworthy achievement which a few years ago would hardly have been conceived possible. American visitors were particularly impressed to discover that the limits of the corn belt had been extended so far north. The event marks a new step in Canadian agricultural history and indicates still another possibility of Canadian agriculture.

Recently, at Prince Albert, in Saskatchewan, was held the first corn show in the history of the province, which again disproved the old-time idea that the northern limits of the corn belt ceased at the international boundary. The Judge, Professor Bennett, of the Saskatchewan Agricultural College, who comes from the heart of the corn belt in the United States and has done much to popularize corn-growing among the farmers of Western Canada, said: "I once thought that North Dakota was the northern limits of the corn belt. This show has proved that excellent corn can be grown several hundred miles further north than was believed possible twenty years ago. The Yellow Dent that captured the top position is the equal of any corn of its kind I have seen."

The Forest and Research

Canada spends about \$300,000 a year on agricultural research and not more than \$5,000 is devoted to forest research. The forests of Canada occupy about 80 per cent. of the inhabitable area and practically the only country in that 80 per cent. of our country will have to be attracted by forest industries.

World's Smallest Fish

Probably the smallest full grown fish in the world is found in the mountain lake, Bulu, on the island of Luzon, Philippines. This fish, which the natives call the ananipad, is the most minute vertebrate animal known to science. It weighs only half a grain, and half an inch is its maximum length.

CHAPTER XII.

If Moran or Helen, early in their conversation, had looked out of the window of the hotel, during one of those vivid lightning flashes, they might have seen a woman stealthily approaching the agent's office across the street. Taking advantage of the deeper shadows and of the darkness between lightning flashes, she stole to the rear of the building, where she found an unlighted window, through which she scrambled with the agility of a cat.

Within the place was pitch dark, but like one amid familiar surroundings, she crossed the hall and found the room she sought; the office room of Moran, but formerly occupied by Simon Bardsale. She bent over the big safe, and with twisting the combination knob in her slim, cold fingers, when she was startled by a noise in the hallway outside. With a gasp of fright, she stood motionless, listening acutely, but there was no further sound; reassured, she produced a bit of candle, which she lighted and placed to one side of the safe, so that the flame was shaded from the windows. She was in the act of manipulating the combination again when her whole body rigid with fear, she stood erect once more, holding her breath and striving for self-control. There was no doubt about the noise this time. Some one had entered the adjoining room.

Hastily snuffing out the candle, she crouched into the darkness of a corner. She never doubted that the newcomer was Rose Moran, or that he would almost immediately discover her. She tried to summon enough resolution to hold her breath through when the moment of discovery should come.

But, as the seconds slipped by and the lights were not turned on, she began to regain her courage. Perhaps Moran was sitting in the dark of the other room, smoking and thinking, and perhaps she could complete her task without being caught. If she moved swiftly and silently. She bent again over the shining knob, at the same time watching in the direction of the door, which was still closed as she had left it. It was difficult to work the lock in the dark, and as she became engrossed with her purpose, she ceased temporarily to listen acutely. She had just succeeded in effecting the combination, when something touched her side.

WANTS TO HELP OTHER WOMEN

Grateful for Health Restored
by Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for backache and for weak and dreary feelings caused by my condition. Sometimes I felt as though I couldn't do my housework. My neighbor told me of your medicine and I read about it in the 'Toronto Telegram' and thought I would take it. I got very good results. It built me up and I have told several friends what it has done for me. You may use this testimonial as it may be of help to some one who has suffered as I have."—Mrs. J. Lee, 25 Harris Ave., Toronto, Ont.

Mrs. Lee is writing to write to you, and answer many questions they may like to ask.

Women suffering from female troubles, causing backache, irregularities, pains, bearing-down feelings and weakness, should take Lydia E. Pinkham's Vegetable Compound. Not only is the worth of this splendid medicine shown by such cases as this, but for nearly fifty years letters like this have been received from thousands of women.

You might be interested in reading Mrs. Pinkham's Private Text Book upon the "Aliments of Women." You can get a copy free by writing to Lydia E. Pinkham Medicine Co., Coburn, Ontario.

W. N. U. 1469

"Don't move! a voice hissed behind her. 'I'll shoot if you do!'" She wanted to cry out, "Please don't shoot!" but her tongue dove to the roof of her mouth, which had suddenly gone dry. She had fallen forward against the door of the safe, and was curiously conscious how cold it felt. She was on the point of fainting when in a flash of relief it dawned upon her that she knew the voice; it was not Moran's.

"Gordon!" she cried jealously, finding the use of her tongue as quickly as she had lost it, and scrambling to her feet. "It's me—Dorothy!"

With an exclamation as joyous as her own and equally surprised, she seized her by the shoulders, peering through the darkness into her face. "Dorothy! What the...?" A lightning flash revealed them, and by to each other. "I told you not to try this."

"But what are you doing in town?" She clutched his arm, overcome by a fear greater than that for her own safety. "Gordon, Gordon, you must not stay here. There's a warrant out for you—no, not for that—for the Jensen shooting. You'll be arrested on sight."

"What?" He stared at her, amazed, and she nodded. "So that's their game, eh? They've stooped even to that. By God!" He struck a match.

"Be careful," she warned him impatiently. "The light—put it out. They'll see it from the street. But, oh, Gordon, why did you come?"

He thrilled at the anxiety in her voice. "To find out what Moran is hiding here, and you're after the same thing, of course."

Impulsively, he squeezed her fingers, until she could have cried out in pain out of the sweetness of it, there were some agonies which do not hurt. Her throat swelled with joy, her breast heaved, and her eyelids fluttered. She was grateful for the darkness, which hid these outward signs of love from the eyes of the world, and she laughed brokenly from sheer happiness.

"You shouldn't have taken such a risk, Dorothy. I told you not to."

"You're taking that risk, Gordon, and more."

"That's different. It's so dark a night, I thought I'd chance it. There's not much risk for me," she declared. "I can reach home in five minutes. It's not so bad."

"We both should have thought of doing it exactly the same time. But come, Gordon, let's get out of here."

"Now that the safe was open, to remove its contents took only a moment, and they tossed all the papers they found into a corner. Then, when Wade had swung the safe around on hinges, they heaved a sigh and hid behind it, where by a shaded candle-light they ran rapidly through their loot. The papers and blue-prints, held together by a rubber band, which he stripped off.

"If we should find nothing, after all," Dorothy whispered, bending with him over the blue-prints. "What are they, Gordon?"

"Maps of my own range, Dorothy!" His tone was tense with excitement, as he leaned nearer to the light. "Well, what do you know about that? By Heaven—" He fairly glared at the sheet before his eyes—"It's all there!"

"What's all there? What is it?" "Gold!" He looked at her in the flickering light, like a man gone mad. "Gold? On your range? Oh, Gordon!"

"Yes; on my range. It's inconceivably ample, almost; but it seems to be true. See! Look here!" Their heads were almost touching, so that her soft hair caressed his face. "This is a map of the upper valley, and the description says these red crosses indicate the location of gold. One is near the head of Fish Creek, not half a mile from my buildings."

"Oh, Gordon, I am so glad!" Dorothy exclaimed. "How wonderful it all is. You'll be rich, won't you?" She was not too excited to remember that his wealth would probably be shared by another woman, but she was too generous to be any the less glad on that account.

"That remains to be seen," he replied. "It may not prove to amount to much, you know. At any rate, Moran won't get any of it. That's worth a whole lot."

She nodded vehemently. "It thought it must be something like that, Gordon. They would never have done the things they have without some powerful reason."

"Yes, you were right, Dorothy. You're usually right." He caught her hand and squeezed it again, and in this moment of their triumph together she could not help returning the pressure. "You're a jewel, a brick, a trump—all those things and then some. The sweet."

"Now, we haven't time for that sort of thing, Mr. Man. We must get away while we can, yes," he finished for her. "But just the same."

Her cold fingers on his lips stopped him.

"Listen!" She put out the candle and they crouched down beside the safe. Some one was coming up the stairs, not stealthily this time but boldly, as one who had a right there, whistling softly. Wade could feel the girl's shoulder tremble against his side, as she slipped his revolver out of its holster.

"Don't Gordon! Don't—you mustn't!"

shook, no matter what happens. Her teeth were chattering, for she was far more frightened now than she had been for herself alone. That's Moran. He mustn't see you here. Remember that warrant. Hide behind the safe. Please!"

"Never!" he muttered grimly. "I'll find us anyhow."

"Yes, yes, please!" She was almost hysterical in her excitement. "I can bluff him till you can get away. He won't hurt me. If he does you can show yourself. Do it for me, for your friends. Please! Remember, he mustn't know that you've learned this secret."

It was Moran, for they heard him now in conversation with some passer-by in the hallway. Dorothy was grateful for the respite, for it gave them time to throw the loose papers back into the safe and close it. Then, then pushed the safe to its original position, the creaking making little noise as they rolled. Then he crouched behind it.

"I don't like this stunt!" he protested; but, yielded to her beseeching apparently wrong, he turned again to her voice must tremble, she knew.

The office now bore little sign of their invasion of it, and, drawing a deep breath, Dorothy schooled herself to calmness as she awaited Moran, who was walking down the hall to the door. She was so sure that her plan had flashed into her mind by means of which she might have both them and herself, if she and her head would only be quiet. The unruly heart was beating so violently that it shook her thin dress, and that her voice must tremble, she knew.

Moran was almost at the threshold, when Dorothy opened the door for him.

"Good evening, Mr. Moran. Did I startle you?"

"Well, not exactly," he said, striking a match, after an instant's pause. "What are you doing here?"

Passing her, he lighted the large oil lamp, and swept the room with a quick, keen glance. Finding nothing apparently wrong, he turned again to his visitor with a puzzled expression in his face.

"I wanted to see you and I thought you'd be here. The door was unlocked, so I just waited in. I've been here only a minute or two." Fortified by another deep breath, drawn while his back was turned, Dorothy found her voice steadier than she expected.

The agent looked at her keenly. "That's strange," he commented. "I don't know what the door was doing unlocked. I always lock it when I leave."

"You must have forgotten to do so to-night."

Half convinced that she was telling the truth, Moran could see but one reason for her evident right; she was afraid of him. The suggestion of that strengthened the impulse which her beauty stirred on him. If she thought so, why not?

"Say, you're a good-looking kid, all right," he leered. "What did you want to see me for?"

A slight sound from behind the safe, or perhaps she imagined it, caused Dorothy's heart to flutter wildly. She had not anticipated this attitude in Moran, and she instantly realized that

It brought a fresh danger into the situation. She knew that Wade would not remain in concealment if the agent insulted her. She must avoid the chance of that, if possible; must get him out of the office so that Gordon might escape.

"This is no place to talk that way," she said bravely. "It isn't a good place out to be anyway. If people knew I was here, there would be a terrible scandal. I've something important to tell you. Won't you come for a walk?"

"In this rain? Not much," he chuckled. "Come here." She shook her head and tried to smile. "Well, if you won't, I'll have to go to you."

She shrank back from him, as he approached her, with an evil smile. "Say, little one," he went on, "this is a damned funny game of yours, coming here at night. What's the idea, eh?"

(To be continued)

Canadian Wood Helps Uncle Sam

Not Two Per Cent. of the Farmers of Canada Own Any Pulwood

Only fifteen per cent. of the lumber lands of Ontario and Quebec are privately owned. The remainder belongs to the provincial government. The timber from private lands can be shipped out of the country unmanufactured and amount to a million and a quarter cords of pulwood annually, all of which goes to support United States mills. It is claimed that not two per cent. of the farmers of Canada own any pulwood or are interested financially in sending it to Uncle Sam's industries.

An Oil without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

A Wonderful Clock

Timepiece Is the Invention of a Vienna Mechanic

At a Vienna restaurant a wonderful clock is exhibited, the production of an Austrian metal worker, Jakob Jawurek. For twenty-three years Jawurek used all his spare time in the completion of his invention. The clock is made entirely of wood, three metres high, two metres wide, and weighs 300 kilos.

Eighteen dial plates show the time at Vienna, Cologne, Amsterdam, Paris, London, Madrid, Buenos Aires, and several cities in Asia. Built into the clock are the sun, the moon, the date, the figures of hour and second, a chime of sixteen bells, and a terrestrial globe which turns around its own axis in twenty-four hours.

Parlor Car Invented

By Famous Singer

Pullman Chair Car Evolved From Jenny Lind's Idea

Although it seems reasonable that a woman should have a finger in anything connected with a parlor, yet it is perhaps not generally known that Jenny Lind, the famous singer, was in a large degree responsible for the modern "parlor car." When she came to America with P. T. Barnum, the engagements of her tour obliged her to spend much of her time traveling from place to place on the wretched railroads of the period. To ease the discomforts of the trip, she had the seats removed from an ordinary car, and replaced with chairs, tables, couches and such pieces of furniture as might be found in an ordinary parlor. She called it jokingly her "parlor car," and out of her idea grew the present Pullman chair car.

May Shortly Announce Agenda Of Forthcoming Imperial Conference

Ottawa.—The agenda of the coming Imperial conference and the coming economic conference in London were subjects of inquiry in the House by Right Hon. Arthur Meighen, Conservative leader. He asked when the information would be available for members.

Premier MacKenzie King said he had called a week ago to the British authorities for permission to make the documents public, but had yet received no reply. He would send another cable.

The Premier declared he had himself protested very strongly against having to ask permission to bring down such correspondence in Parliament. He intended, he added, that this procedure should be one of the matters discussed at the coming Imperial conference.

Mr. Meighen denied that it had always been the practice to get permission from the British Government before documents of this kind were laid upon the table. Two years ago he had himself given the House the agenda for the conference of premiers without making any prior inquiry of the British authorities.

Christians Leave Turkish City
Constantinople.—Christians are fleeing from Alexandretta, owing to strained relations between France and Turkey, according to the official Anatolian News Agency. Five hundred Armenian families already have departed from the city.

British Living Costs
London.—Statistics prepared by the Department of Labor show that the cost of living in Great Britain on March 21 last was 74 per cent. above the pre-war level, but the lowest since April, 1917. On Feb. 28 last the cost was 76.6 above the pre-war level.

Rain in Yukon
Dawson, Y.T.—Spring began April 17 in the Yukon when the first rain since last autumn fell over Dawson and the thaw commenced.

Flood Conditions in Manitoba
Winnipeg.—With mountainous snow banks disappearing rapidly and melting waters piling up on top of the ice, which is not yet broken in creeks and rivers, flood conditions prevail in some parts of Manitoba.

RED PIMPLES ALL OVER FACE

Itched and Burned. Face a Slight. Cuticura Heals.

"My face came out all over in little red pimples and then it would itch. I would rub and scratch it and little eruptions would come. They itched and burned and at night would bother me. My face was a sight. I tried different remedies without success and then began using Cuticura Soap and Ointment which completely healed me in two weeks." (Signed) Mrs. Eva M. Touchette, Cundy's Harbor, Maine, March 13, 1922.

Use Cuticura for every-day toilet purposes. Bathe with Cuticura soap with Ointment, dust with Talcum. Sample Soap Free Mail Address: "Cuticura," Dept. 444, Post Box 1, St. Louis, Mo. Send 10c. for Ointment and Soap. Talcum free. Cuticura Soap shares without measure.

Will Bar Soviet Delegation

Melbourne, Aus.—Commenting on the report that the Third International of Moscow is sending eight delegates headed by Radek to the Communist Congress to be held in Sydney, Premier Bruce said the Federal Government would prevent the arrival of persons seeking to disturb the existing social system and accepted form of government in Australia.

HAD BAD PAINS IN HER HEART

Nerves Were Very Bad

Mrs. John Case, R. R. No. 4, St. Catharines, Ont., writes:—"I wish to say that I have been bothered very much with my heart and nerves, decorated with two different doctors, but did not find much relief. I would have such bad pains in my heart, at times would be almost afraid to move or breathe, and at night I could not sleep. If the pains in my heart were gone, my nerves would be so bad I could not lie still and would only get a little sleep by being tired out. My stomach was also very bad and I could eat but very little, and then only certain things or I would have so much distress which always made my heart worse. I had been suffering for nearly two years until one day I was talking to our druggist about the way I felt. He advised me to give Milburn's Heart and Nerve Pills a fair trial. I have now taken five boxes and am feeling so much better. I am able to do my own work, and can eat anything I wish. I cannot praise."

Price 50c. a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Will Hold Corn Show

\$500 in Prize Offered in First Provincial Show in Saskatchewan.

Regina.—Over \$500 is offered in prizes in the provincial corn show to be held at Maple Creek, November 14 and 15. There are nine classes, with 20 prizes offered in the principal classes or Novelties, White Flint, Geln Yellow Flint and Northwest Dent, and nine to 15 prizes in the other classes.

Samples of the excellent corn produced in the Maple Creek district were sent to the Ogilvie Flour Mills at Montreal by the field crops branch of the provincial department of agriculture, and on testing the samples for milling purposes the company was so impressed that the management offered the department a sum of \$1,250 payable in 10 instalments of \$250, for the purpose of promoting the growing of corn in Saskatchewan. The Maple Creek Agricultural Society agreed to offer a similar amount, or more, if necessary, to promote the first provincial corn show.

Radio From Atlantic to Pacific
Prince Rupert, B.C.—Radio communication tests between Prince Rupert and Halifax, N.S., have proved successful. The tests were carried out by Jack Barnsley of this city, communication being established in a few hours.

Chinaman Jumped 130 Feet
Vancouver.—Tong Ching jumped 130 feet from the Georgia Viaduct here into a railway yard, but struck a small pool of water and mud and sustained only minor injury. Police believe his dive was deliberate.

Labor Party Delegation Makes Report On The Situation In The Ruhr

London.—"France is spending millions on the occupation and getting next to nothing out of it; she is using a whale to catch a sprat."

This strikingly-phrased conclusion was contained in the report of the Labor party's delegation which went to the Ruhr about the middle of March to investigate the situation there and in other parts of Germany.

The delegation was composed of Thomas Shaw, Charles R. Burton and William Adamson; all members of the House of Commons.

The report declares that the delegation found a state of war existing in the Ruhr, and lays stress on the dangerous possibility for the future of such conditions, where the occupation force runs the risk of being "inextricably involved in the common ruin and being itself wiped out."

Admitting incompetency to express an opinion on the legal aspects of the situation, the report proceeds:

"In our judgment, the situation cannot adequately be dealt with by any machinery under the treaty of Versailles, but requires a new instrument, international in character, in the framing of which the German people should participate."

The report makes no definite recommendations, but suggests that as delay may be fatal, an appeal should be made to the French and German Governments to submit their proposals with regard to reparations and security to an international tribunal, and, since British interests are more directly involved than those of any other state, except France, Germany and Belgium, that the initiative should be taken by the British Government in the form of a frank and definite statement of British policy, and that no effort should be spared to keep in touch with both sides in order to take advantage of every development calculated to narrow the gap between their conflicting terms and terminate the present deadlock.

Chile Makes Proposal To Limit Armaments

Suggests Acquiring No Ships During Five-Year Treaty

Santiago, Chile.—Chile, before the armaments commission of the pan-American conference made a concrete proposition for limiting Latin-American countries in acquisition of capital ships. The Chilean delegate recommended a five-year treaty, during the tenure of which no capital ships would be acquired.

The treaty would expire May 1, 1925, but would be automatically renewed for five years more unless denounced by a signatory nation. Chile also announced that she was ready to enter into agreement to limit land armaments.

Ends Corporal Punishment

Tallahassee, Fla.—The House voted 63 to 15 to abolish corporal punishment in this state in the handling of county prisoners.

Serve Raisin Food—Raisin Week—April 23 to 29

Have You Tried Them from your modern bakers' ovens?

—These big, brown leaves of "old-fashioned" full-fruited raisin bread?

Note the raisin flavor that permeates these loaves.

Count the big, plump, tender, juicy raisins in each slice.

It's real raisin bread—the kind you're looking for.

Ready-baked to save baking at home. Delicious and convenient—and economical in cost.

We've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Order from your grocer or a neighborhood lake shop.

Say you want the bread that's made with Sun-Maid Raisins.

Good raisin bread is a rare combination of the benefits of nutritious cereal and fruit—both good and good for you, so serve it at least twice a week.

Use more raisins in your cakes, puddings, etc.

You may be offered other brands that you know less well than Sun-Maid, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins. Mail coupon for free book of tested Sun-Maid recipes.

SUN-MAID RAISINS The Supreme Bread Raisin

Sun-Maid Raisins are grown and packed in California by Sun-Maid Raisin Growers, a co-operative organization comprising 14,000 grower members.

JUDICIAL SALE OF FARM PROPERTY.

Pursuant to the judgment and final
order for sale, there will be offered
for sale by public auction, in the
presence of the Master in Cham-
bers of the Supreme Court, by W. M.
WASHBURN, Esq., Auctioneer, at the
P. Miller Hotel in the Town of
Stony Plain, in the Province of Al-
berta, on SATURDAY, the 12th day
of May, A.D. 1923, at the hour of two
o'clock in the afternoon.

The East Half of Section Twenty-
one (21), Township Fifty-two (52),
Range Two (2), West of the Fifth
Meridian; Reserving thereout all
mines and minerals, petroleum,
gas and all valuable stone; Es-
cepting 60-100ths of an acre for a
roadway from the Northwest Quar-
ter thereof.

In 3 Parcels known as Parcel No. 1
composed of the whole of the East
Half above mentioned; Parcel No. 2
composed of the South-east Quarter
of Section 21 above mentioned; and
Parcel No. 3 composed of the North-
east Quarter of the said Section 21.
Subject to the reservations and
conditions in the original grant from
the Crown or in the existing Certifi-
cate of Title, any Seed Grain Liens
still outstanding of which notice will
be given at the time of the sale, and
taxes for the current year.

Each Parcel is offered for sale sub-
ject to a Reserve Bid.

The Vendor is informed of the fol-
lowing particulars:

Parcel No. 2, being the South-east
Quarter of the said Section, is com-
posed of 160 acres, of which approxi-
mately 108 acres are good arable
land; 10 acres of lake; 20 acres of
hay meadow; 2 acres of muskeg and
20 acres of scrub land. The property
is fenced on all sides with 2
and 3 strand wire fence and tamar-
c trees. The soil is black clay loam
averaging approximately 6
inches in depth with clay sub-soil.
The property is watered by a lake.
The nearest railway station to said
property is Carvel, a distance of
11 miles. The property is three
miles from a school and church.
There are no buildings on the said
quarter section. There were 75
acres under cultivation on said
quarter section last year.

Parcel No. 3, being the Northeast
Quarter of the said Section, is com-
posed of 160 acres, excepting 60-
100ths of an acre for a roadway,
of which approximately 130 acres are
good arable land; 8 acres of mus-
keg; 2 acres occupied by buildings
and outbuildings; and 20 acres of scrub
land. The property is fenced on
all sides with 2 and 3 strand wire
fence and tamarac posts. The soil is
black clay loam averaging approxi-
mately 6 inches in depth with
a clay sub-soil. The property is
watered by a well. The nearest
railway station is Carvel, a dis-
tance of 11 miles. The property is
3 miles from a school and church.
There are the following buildings
on the said quarter section: One
storey log house with two log
wings; 1 granary, log, 20 x 28;
1 log hen house, 20 x 10, shingle
roof; 1 barn, 21 x 18, shingle roof;
1 log smoke house for meat, 6 x 6;
unfurnished machine shed, 30 x 16;
1 log barn, slab roof, 22 x 14; 1 log
barn, slab roof, 16 x 12; 1 shed
with a r.c. roof, 24 x 24; outside
collar with building over 12 x 10,
humber roof. There were 45 acres
under cultivation on said quarter
section last year.

The terms of the payment are as
follows—Ten per cent to be paid to
the Vendor's solicitors at the time of
sale, and the balance of the purchase
price into Court within sixty days
thereafter without interest; or, in
the alternative, 10 per cent as afore-
said, and in the case of the sale of
Parcel No. 1, being the whole of the
East Half of said Section 21, the
Vendor is prepared to accept a Mortgage
on the said lands for \$2500.00,
repayable in four equal, annual, con-
secutive payments of \$625.00 each,
the first of such instalments to be
paid one year from the date thereof
and the balance in five years from
said date with interest at 9 per cent
per annum payable yearly, and in
the case of either Parcel No. 2 or
No. 3, the execution of a Mortgage
by the purchaser for the sum of
\$1000.00, repayable in five equal, an-
nual payments of \$200 each, the first
of such instalments to be paid one
year from the date thereof, with in-
terest at 9 per cent per annum pay-
able yearly; and the remainder of
the purchase price to be paid into
Court within 60 days from the date

The Weekly Poem.

How dear to this heart are the
scenes of next summer
Or any old summer, as long as it's
hot
For all through the winter, oh,
what could be dumber
Than staying tied up in a half
frozen knot?

His Preference.

One of the Saskatoon girls was
trying to carry on a conversation
with Skitch despite the noise of the
train. She said, "Do you like haa-
anas?"

"What?"
"Do you like haaanas?"
"O, no," he said, "I much prefer
the old fashioned night shirt."
—Canoe Canadian.

Some Real Cheap Horseflesh

A story is going the rounds
which although it should not be
taken literally, serves to show the
trend of prices of horseflesh. A
local drug store imported a fine
batch of canaries last week, when
a farmer walked in and priced
them. He said, "I'll trade you a
team of canaries for one of those
birds." And the druggist turned
him down.—The Hain Herald.

All in One Evening.

The Raffle Club held its
meeting at the home of a
member the other night; when
the coffee course was reached
the lamp was accidentally
tipped over when two mem-
bers reached for some cake,
but no one was seriously in-
jured; on the way home a
member slipped off the side-
walk, another tripped into a
picket fence, and two others
were indisposed all the next
day. Outside of these and a
few other minor mishaps, the
meeting proved to be a very
successful one.—Chinook Ad-
vance.

of the sale without interest. In all
other respects the terms and condi-
tions of sale will be the standing
conditions of the Supreme Court as
approved by the Master in Cham-
bers.

Further particulars may be had
from Messrs. Dickson & Paterson,
Barriers, etc., 563 Tegner Building,
Edmonton.

Dated at Edmonton, Alberta, this
6th day of April, A.D. 1923.
"R. P. WALLACE,"
Clerk of Supreme Court.

Stony Plain and District

Articles intended for insertion in The Sun must be in the office not later than 5 p. m. Monday to insure insertion.

Income Tax blanks are to be had from the Postmaster.

At Eventide the man who milks his cows can say, "Another day, another dollar!" Being your cream to Kelly.

Owing to the scarcity of hogs, Mr. Gus Zucht will be in the market for hogs every 2 weeks only. He is buying this week.

Stony Plains fire engine is said to be on its way up from the Ontario factory.

The engine and generator for the Armbruster mill has arrived, and will be set up at once.

Mary Calahoo, an old resident of the district north, is holding an auction sale today.

Lloyd George M. D. will pay 1-2 cent for each gopher tail delivered to his Secretary before June 21 in Camrose.

Why not arrange a definite plan for your boy by securing an Educational or Life Career Policy from Lloyd E. Wood, of Crown Life Insurance Co.? Two cents a day would do it. 835-6 Tegner Block, Edmonton.

The Pavilion at Wabamun opens on May 24th.

Johnny Miller says the complete Ford touring car can be bought for \$666.

Death of Mrs. Ingle.

Mrs. A. G. Ingle, who had been ailing for some time and was taken to the Royal Alexandra Hospital for treatment, died in that institution on Sunday last, in her 43rd year. The remains were buried in Beechwood Cemetery this day following. She leaves besides her husband a young son. The deceased was well and favorably known in this district, and leaves a large circle of friends to mourn her loss.

New Seats for Alberta.

Plans for redistribution of federal seats in Alberta are practically worked out. The four new seats will be substantially as follows: Peace River out of the northwest part of West Edmonton; Athabasca, out of the north-east part of East Edmonton; a new constituency out of parts of Medicine Hat and Battle River; a new constituency out of parts of Victoria, Battle River and Red Deer. The present constituencies will retain their names.

The regular meeting of the Women's Institute will be held on May 24, at the home of Mrs. R. B. Brookes. Everybody welcome.

Capt. Maculay, of Victoria, was a week-end visitor with Mr. Cavenagh.

The Alberta Legislature prorogued on Saturday last.

A branch for the sale of Goodyear tires and auto-accessories was established in Stony last week.

After spending the winter in the East, Mrs. Adolph Muldenbauer has returned to her home in the Carvel District.

At Mr. Miller's Garage.

Those who attended at Johnny Miller's Radiophone station Monday night had the pleasure of listening to the Edmonton Journal's very excellent program from its new Marconi transmitter recently installed. The opening piece, a march played on the McDougall Church organ, came very distinct, as also, did the address by Rev. Geo. A. Clark on "St. John's Day." The rendition of "The Marseilles" and the other numbers on the long and excellent program also were highly praised.

A Potato Starch Factory.

Potato-flour starch, dried, sliced, dehydrated and hydrated potatoes, as well as dextrine and alcohol, are some of the products which it is proposed will be turned out from the establishment of a potato handling factory which is about to be erected in Edmonton district by the newly formed company called The Potato Products Company, Limited.

The question was discussed last season, but too late for anything to be done toward handling the crop, but now it is anticipated that something may be done in order that the surplus potatoes hereabouts may be taken care of.

A similar plant, has recently been established near New Westminster, B. C., and it has been operating successfully. Several other successful establishments are operating in Washington State.
